## 1. INTRODUCTION

The Frances Baard District Municipality hereby invites prospective bidders to supply and deliver 3-layer face mask for its work force. This will reduce the transmission of spreading the COVID-19 virus.

The President of South Africa announced and put lined interventions that employers should undertake to manage the virus of COVID-19 as part of containing the spread.

The National Department of Health (NDoH) has recommended the fabric face masks as an additional preventative measure against COVID-19 to be used by the public.

## 2. PROJECT OBJECTIVES

The Regulations provide that an employer must provide employees who may come into contact with the public as part of their duties with a cloth face mask, homemade item or another appropriate item to cover his or her nose when in a public place. This is further expanded in the Directive, which provides that every employer must provide each of its employees, free of charge, with a minimum of two cloth masks to wear while at work and while travelling to work, including those employees who may come into contact with the public as part of their duties.

## 3. SPECIFICATIONS FOR MASKS

Three (3) Layers of fabric (As per DTIC guidelines and Specifications)

Inner Layer (next to face)

- The main purpose of this layer is to provide a smooth, soft, pleasant feel against the skin.
- The fabric should not irritate the skin in any way or allow the build-up of moisture or excessive heat in between the skin and the mask.
- Avoid water repellent fabric that inhibit the absorption of droplets. It must not wet easily or accumulate excessive moisture with breathing.
- The fabric should have very high air permeability and should not restrict normal breathing.
- Synthetic fibres are recommended for quick drying properties.
- If cotton, poly-cotton or viscose are used, care should be taken as these fabrics can be highly water absorbent and might become wet against the skin. They

can also impact on heat generation, potential fibre/fluff shedding and drying time after washing.

- Plain weaves (lightweight, low count), providing air permeability is high and fabric is washable.

#### Middle Layer (optional filter layer)

- The primary function of this layer is to trap or stop particles 5 micron and larger.
- It should have a barrier efficiency of at least 75%.
- Filter fabric should not restrict air permeability or impede on the air permeability of the completed mask.
- It is suggested that the filter fabric should not block > 25 % of airflow through the fabric.
- Filter fabric should not shed fibres or disintegrate with use in any way, causing potential of fibre inhalation or failure to filter.
- It should not add or create unnecessary heat load.
- Filter should be replaceable via a pouch between inner and outer layer of mask (envelope).
- It must be possible to disinfect filter daily or wash with hot water [Minimum filter size 100mm x 120mm] i) Ideal product — nonwoven or similarly performing fabric that meets the recommended requirements.

#### Outer Layer (faces outwards)

- This layer can be woven, warp knitted.
- Fabrics should not allow liquids to move through them.
- Hydrophobic or water repellent properties are recommended to prevent wetting from external sources and improve soil repellence.
- Fabrics should not restrict normal breathing.
- Care should be taken that this layer does not ruin the breathability of the mask
- A firm finish will prevent the mask from collapsing with breathing.
- Outer and inner layers can potentially be of the same fabric.

## Measurements

Masks must be designed to fit properly, ideally covering at least 50% of the length of the nose and fit to 25mm under the chin. A guideline for the adult size of pleated mask designs is 180mm for the width and 160mm for the length (maximum unpeated length).

The mask must have a nose bridge.

## Elastic band

The ties or elastics used to fit the mask to the face should not be designed to require that the wearer touches the front of the mask at all.

Comfortable elastic bands of adequate size and shape for attachment around the ears should facilitate comfortable fit. Further adjustments to the dimension of this elastic will enhance fit for more users permitting flexibility in the adjustment.

The colour for the elastic should be black or navy.

## Cover Design

The mask cover design must be as per the picture below:

The colours of the mask should be Black, Mustard and Green. The logo must be embroidered onto the outer layer as per table below:

		C42	M75	Y76	K56
		C18	M42	Y86	K2
		C33	M71	Y71	K24
		C2	M27	Y13	K0

**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Municipal Bidding Document (MBD) must form part of all bids<sup>1</sup> invited.
  
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
  
- 3 Municipal Supply Regulation 38 (1) prescribes that a supply chain management policy must provide measures for the combating of abuse of the supply chain management system, and must enable the accounting officer, among others, to:
  - a. take all reasonable steps to prevent such abuse;
  - b. reject the bid of any bidder if that bidder or any of its directors has abused the supply chain management system of the municipality or municipal entity or has committed any improper conduct in relation to such system; and
  - c. cancel a contract awarded to a person if the person committed any corrupt or fraudulent act during the bidding process or the execution of the contract.
  
- 4 This MBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
  
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (MBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

8. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this bid invitation relates.
9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.
